4. AI Demand Dashboard Demo

The background is a solid dark blue. It features several large, abstract, light blue geometric shapes. In the top left, there's a shape resembling a stylized 'X' or a series of overlapping triangles. In the top right, there's a large 'L' shape. In the bottom left, there's a curved, comma-like shape. In the bottom right, there's a shape that looks like a stylized 'C' or a thick, curved line. At the very bottom, there's a horizontal shape with a small rectangular notch in the center.

Purpose

Purpose

An overview presenting key findings of In-Demand AI skills which includes:

- Is AI in demand in today's job market?
- What Type of AI Skills are in demand?
- Which Type of Generative AI is in demand?
- Technical vs Non-Technical for Areas of Occupations, Industries, and Education Levels
- What is the Average National Job Postings for AI Skills?

Key Findings

Is AI in demand in today's job market?

The National Demand for jobs having skills in AI has significantly increased from 2020 to 2025.

Skills

Gen AI: 150K+ job postings

PyTorch: 50K+ jobs postings

TensorFlow: 50K+ jobs postings

Occupation

Computer & Research Scientist:

300K+ job postings

Software Developers:

200K+ jobs postings

Computer Occupations:

100K+ jobs postings

Industries

Professional & Tech. Services:

300K+ job postings

Information: 150K+ jobs postings

Manufacturing: 150K+ jobs postings

Regional

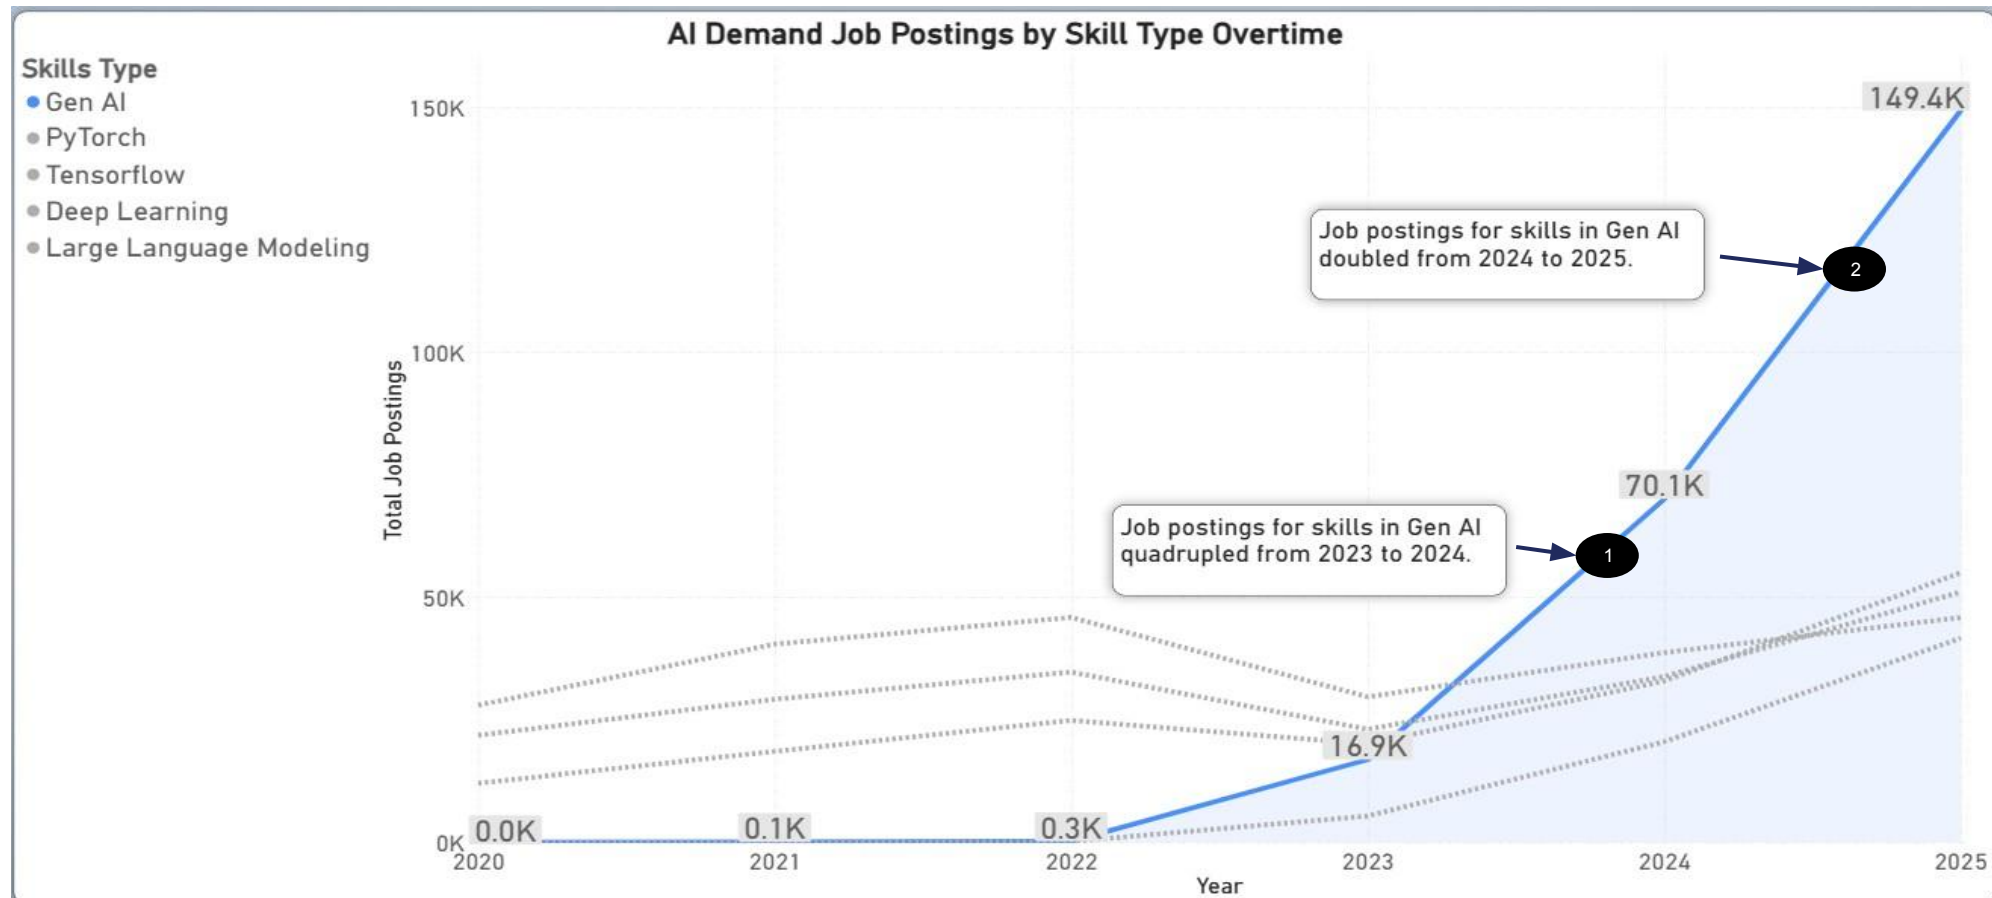

California: 200K+ job postings

Texas: 75K+ jobs postings

New York: 75K+ jobs postings

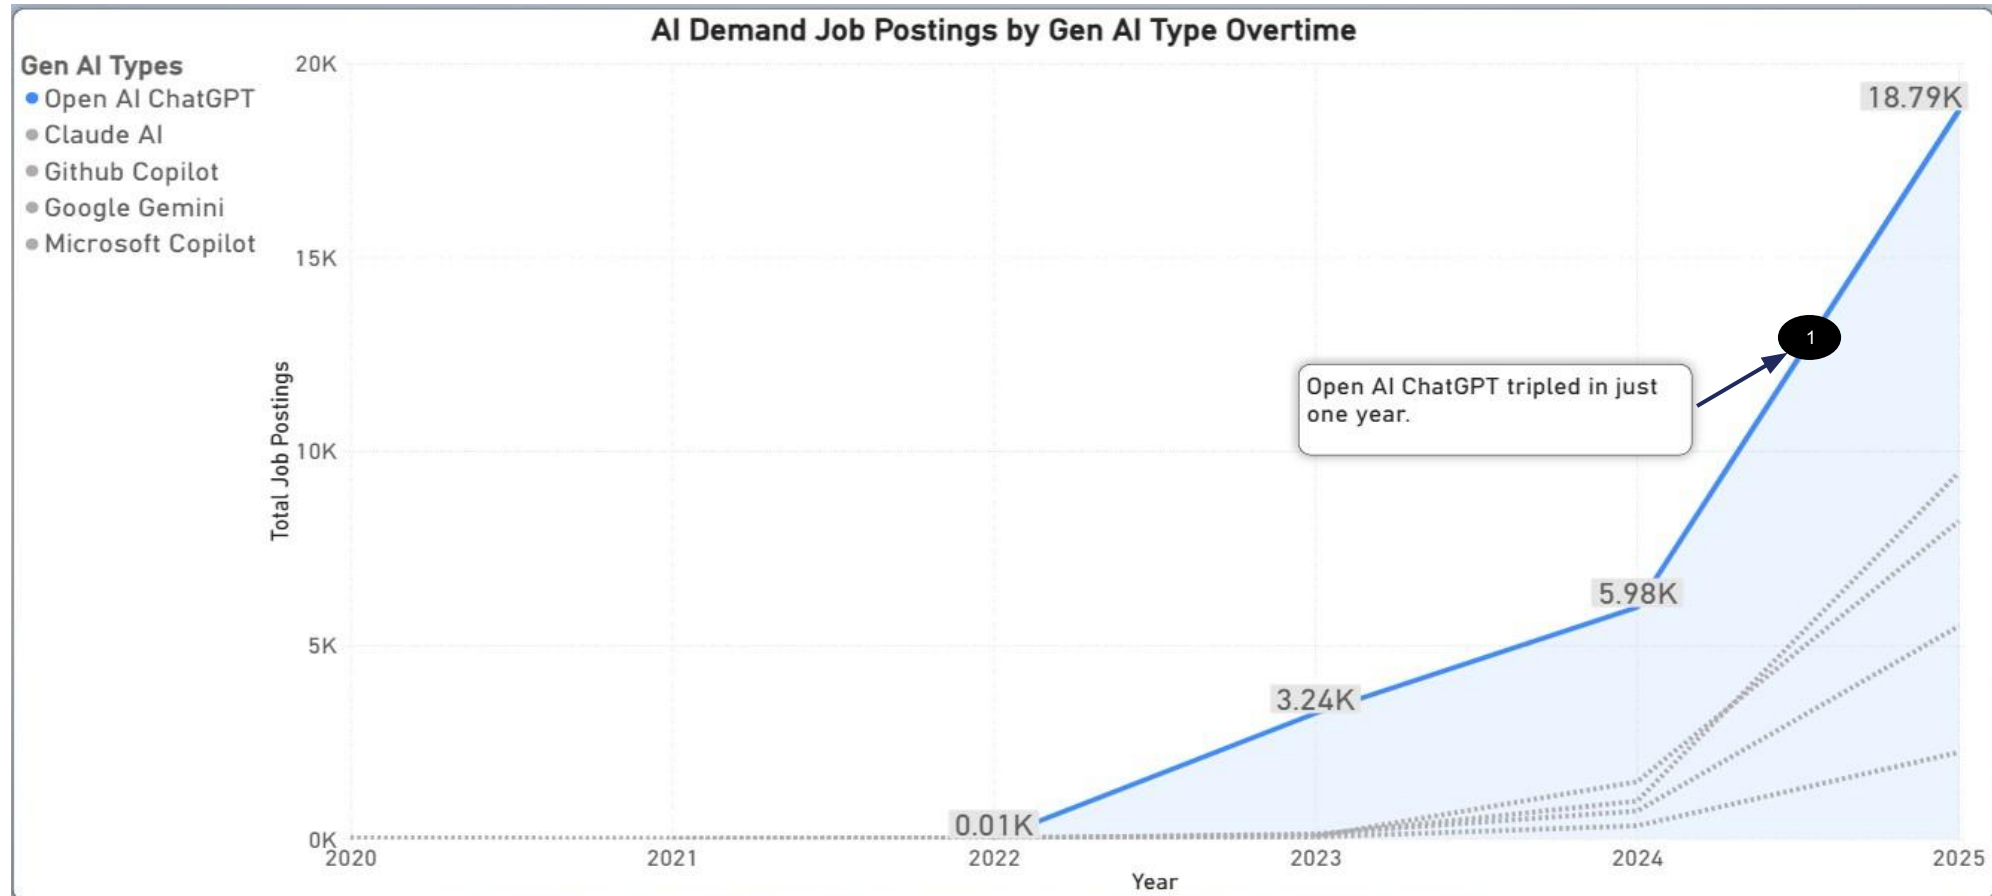

What Type of AI Skills are in demand?

From 2020 to 2025, Gen AI has massively increased dominating all AI skill types.

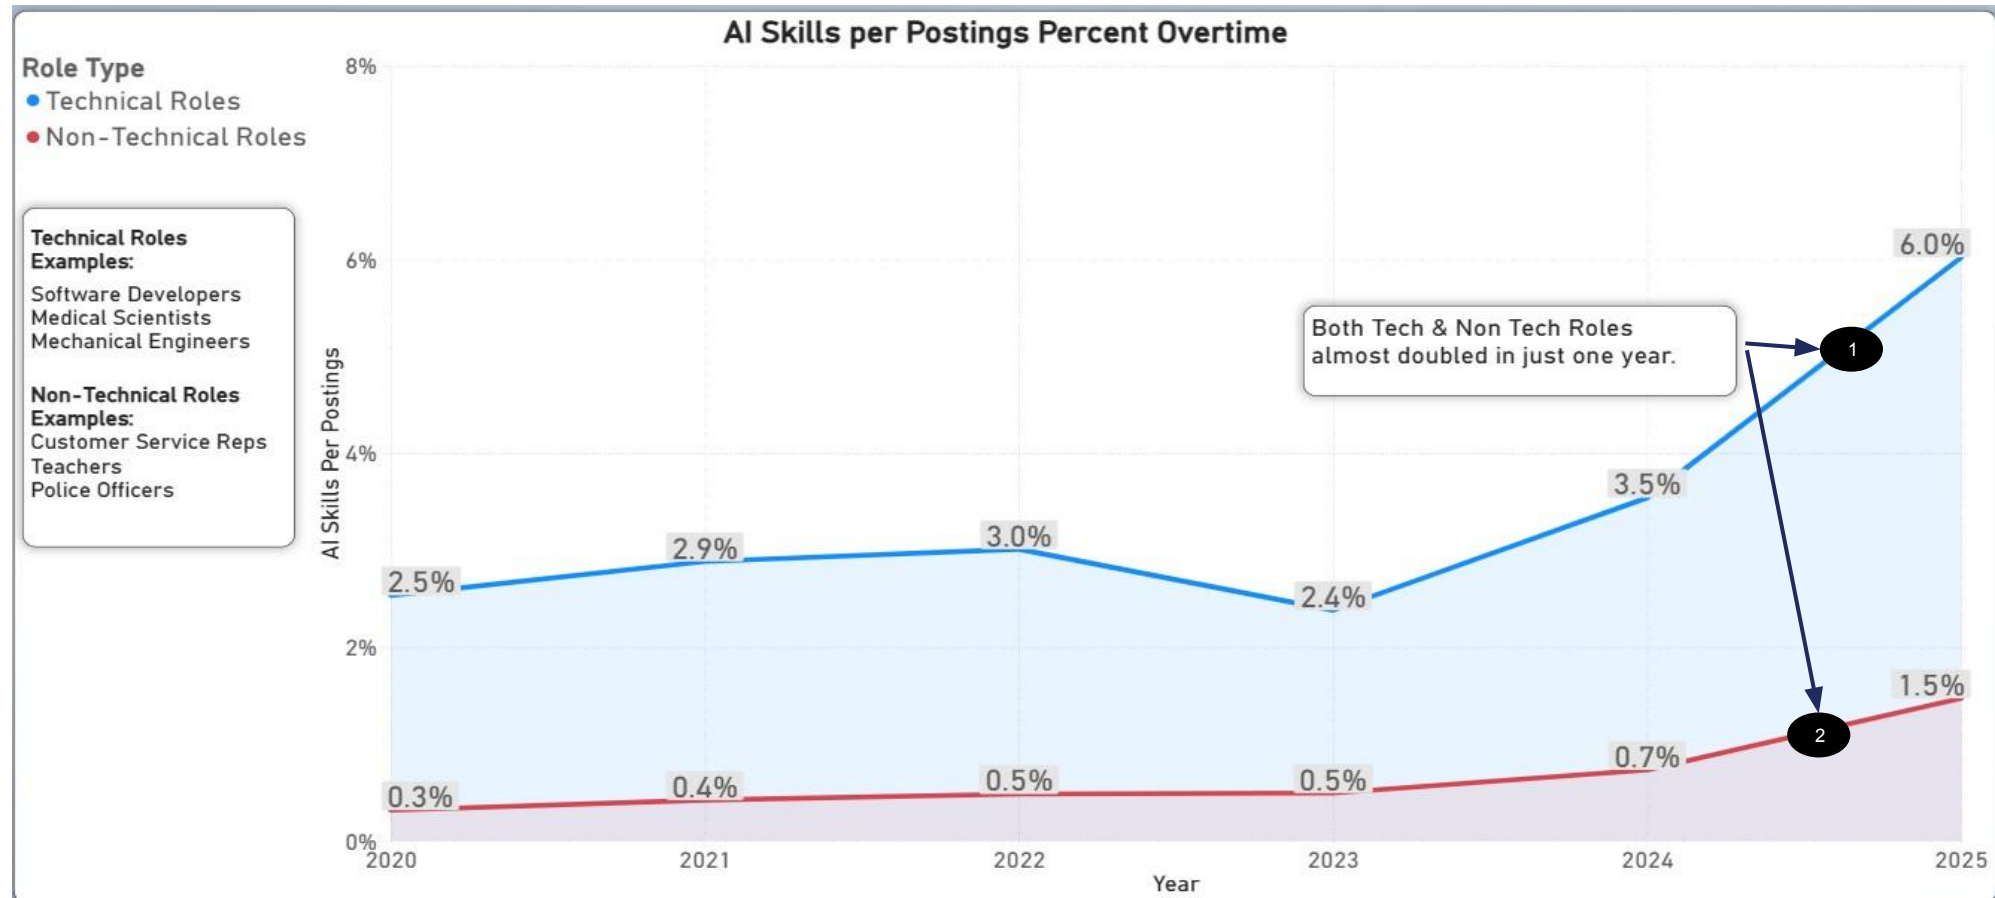

Which Type of Generative AI is in demand?

For total job postings, Open AI ChatGPT dominates over other top Gen AI skills.

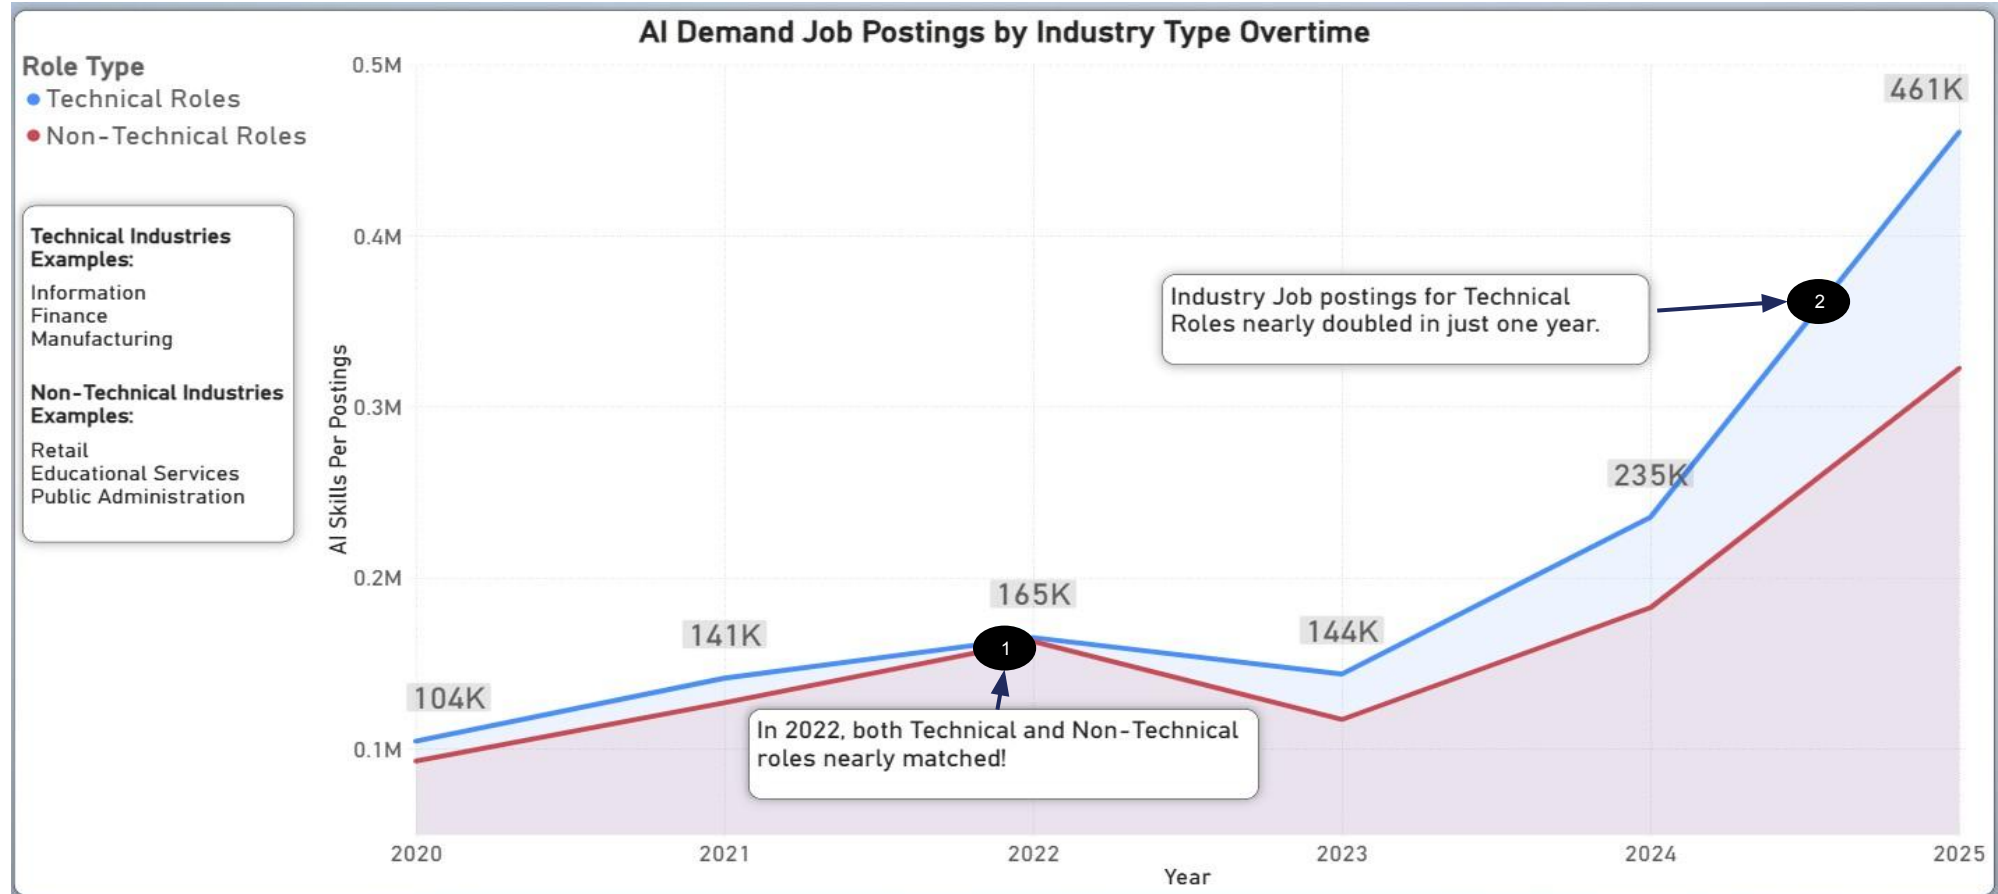

Technical vs Non-Technical Occupations

For occupations, both technical roles (blue line) and non-technical roles (red line) surged rapidly in just one year.

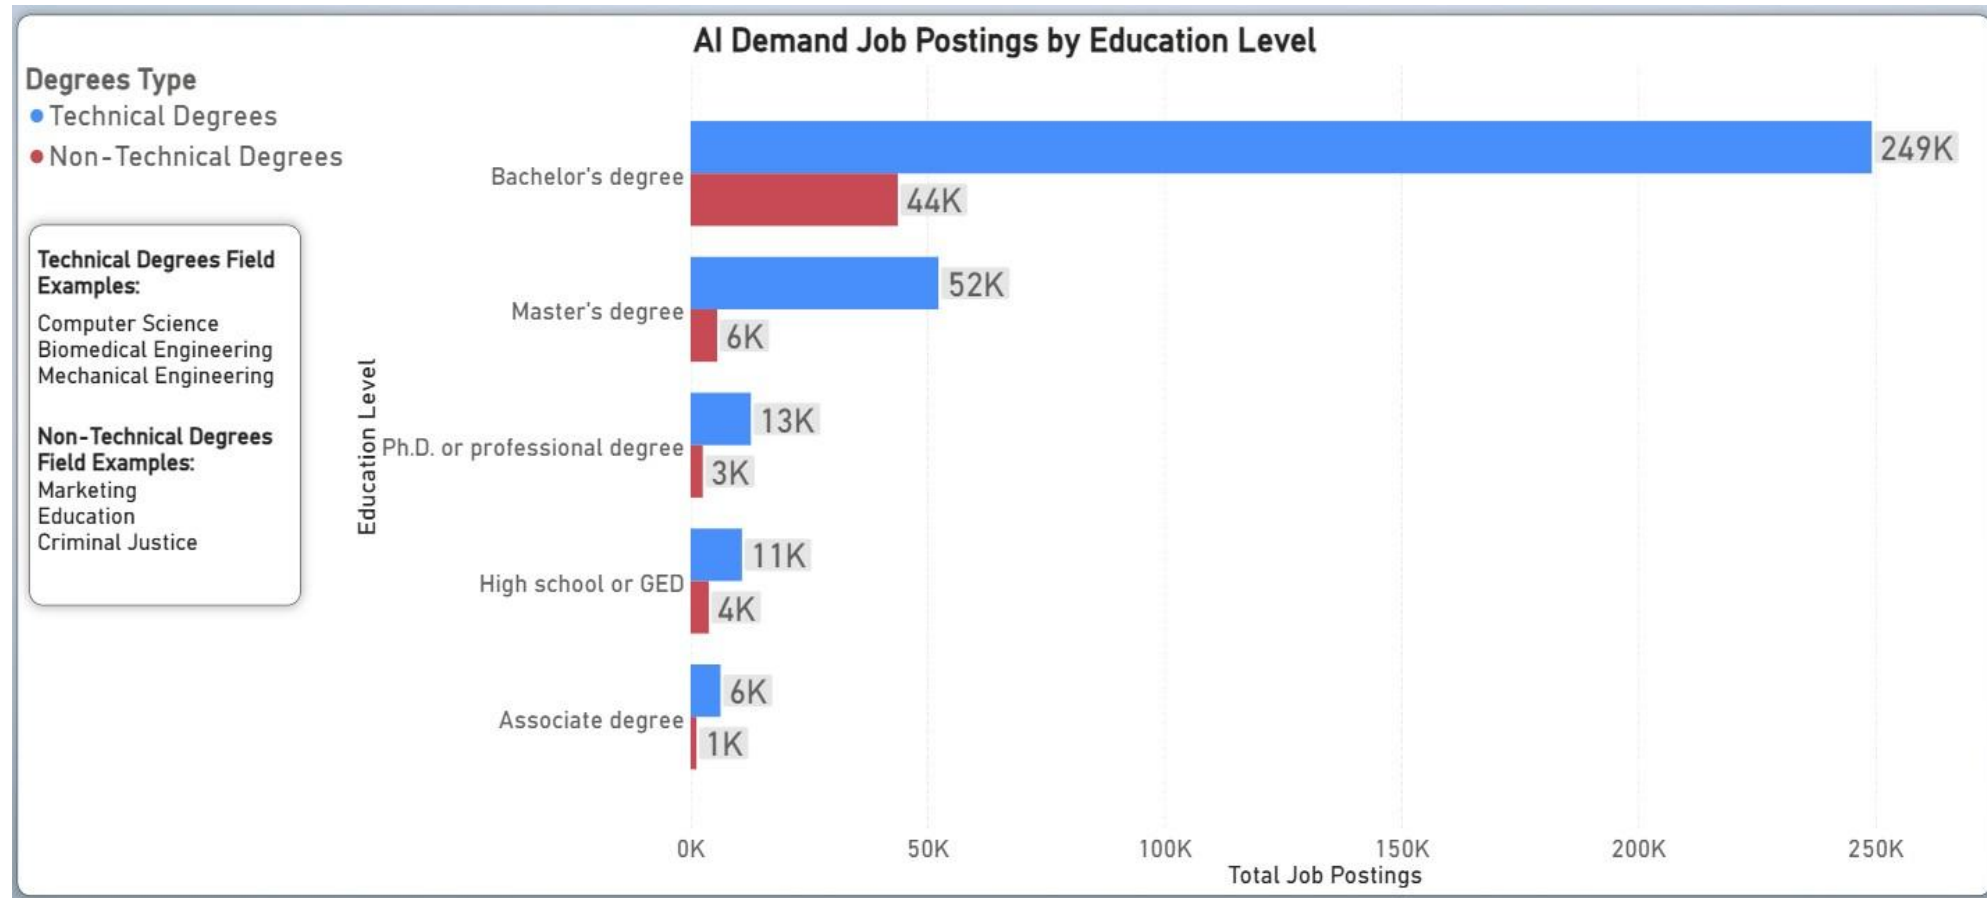

Technical vs Non-Technical Industries

For industries, tech job postings reached a high of 461K, representing a key divergence from 2022 when both roles were nearly matched.

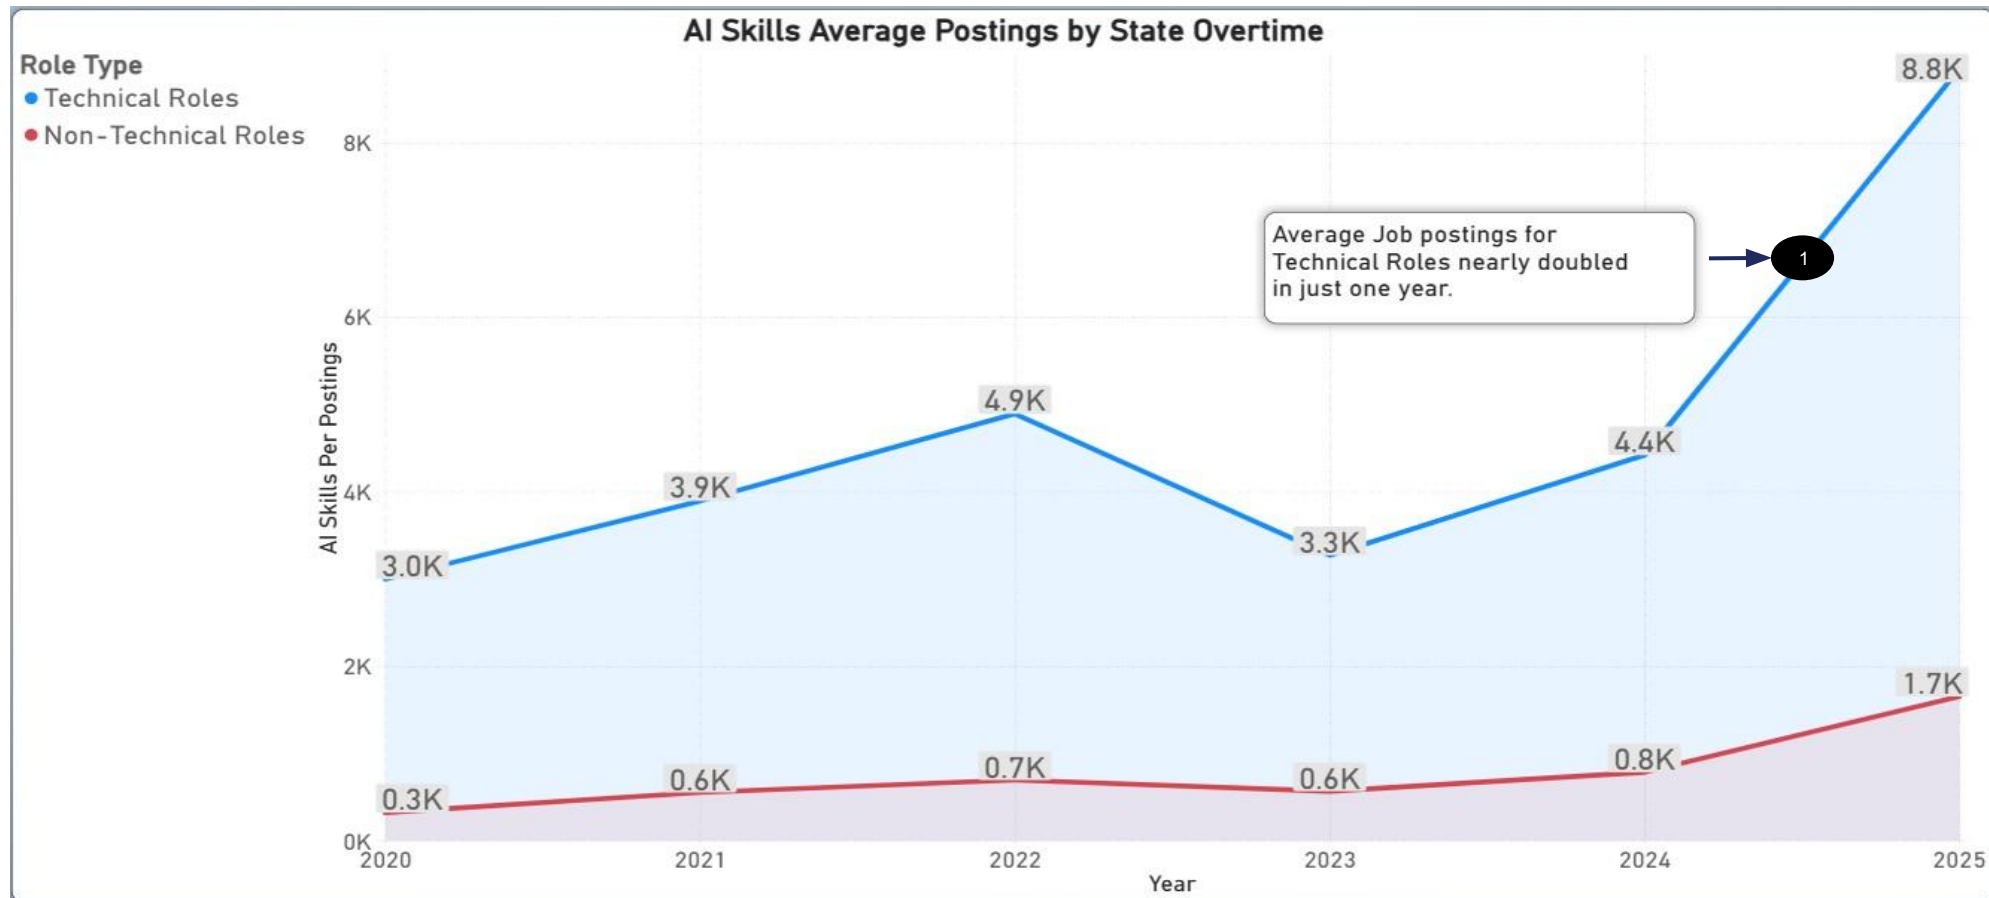

Technical vs Non-Technical Education Levels

For education levels, Bachelor's degree with tech roles massively outnumbered non-tech roles in AI demand job postings.

What is the National Average Job Postings for AI Skills?

Nationally, the gap in tech and non-tech job postings widened rapidly from 2.7K in 2020 to 7.1K by 2025.

The Path Ahead

The Path Ahead

Is AI in demand in today's job market?

Yes, based on the key findings AI has significantly increased over the last five years.

However, various factors must be taken to consideration:

- **Role Variance:** Technical roles require AI skills far more than non-technical roles.
- **Industry Variance:** AI skill demand varies significantly by sector.
- **Geographic Spikes:** AI job postings fluctuate heavily by state and region.
